SKILLS

React, React Native, JavaScript, Node.js, MongoDB, Html, CSS, Typescript, C#, Python, Tailwind

SELECTED PROJECTS

Shebatime - E-commerce Platform for Cosmetics

E-commerce platform featuring a web app, application, and dashboard, all designed and developed from scratch. Topics covered include full-stack development, UI/UX design, React, React Native, Node.js, Express, MongoDB, and responsive design.

Bosscar - Car Selling Platform

A platform for buying and selling cars, featuring a cross-platform app and dashboard developed from end to end. Covered full-stack development using React, React Native, TypeScript, Node.js, and MongoDB, with a focus on creating a seamless user experience.

INTERESTS

Game development (especially Unreal engine), AI (specifically NLP), and movies

PROFILE

As a self-taught full-stack developer, I bring a hands-on and adaptive approach to crafting comprehensive software solutions. With a focus on both frontend and backend development, I have acquired the skills needed to create robust and efficient applications. My journey as a self-learner reflects my commitment to mastering the full spectrum of development, enabling me to tackle challenges with a versatile and innovative mindset.

WORK EXPERIENCE

Junior Front-end Developer

Touchcore Inc. 2021 - 2022

- Spearheaded the entire front-end development for multiple projects, demonstrating proficiency in React, Redux, and React Native.
- Successfully implemented the front-end architecture for FixerWithin, an app connecting handymen with customers, ensuring a seamless user experience.
- Developed both the mobile app and dashboard for TetraOne, a real estate application, using React, Redux, and React Native.
- Contributed to the creation of VoixOut, a social media platform, by leading the front-end development and incorporating user-friendly features.
- Played a key role in the development of Odiopay, an e-commerce platform, by implementing robust front-end solutions and optimizing the user interface for a smooth shopping experience.

Front-end Developer

Startuppagile 2022-2023

- Led the development of the user interface for Mamba Fantasy, a fantasy betting application, utilizing React Native and TypeScript to create a dynamic and responsive frontend.
- Took a hands-on approach to both frontend development and API integration for StartupAgile's internal projects, showcasing versatility in technical skills.

Senior Front-end Developer

Touchcore Inc. 2023-Present

- Develop and maintain front-end solutions using Next.js, TypeScript, and Tailwind CSS, delivering multiple high-conversion landing pages
- Build and manage multiple React Native applications, ensuring smooth performance and seamless user experiences across platforms.
- Lead front-end development on a live booking website, enabling users to book hotels, tours, and flights efficiently.
