PROFILE

As a self-taught full-stack developer, I bring a hands-on and adaptive approach to crafting comprehensive software solutions. With a focus on both frontend and backend development, I have acquired the skills needed to create robust and efficient applications. My journey as a self-learner reflects my commitment to mastering the full spectrum of development, enabling me to tackle challenges with a versatile and innovative mindset.

WORK EXPERIENCE

Front-end Developer

Touchcore Inc.   2021 - Present

- Spearheaded the entire front-end development for multiple projects, demonstrating proficiency in React, Redux, and React Native.
- Successfully designed and implemented the front-end architecture for FixerWithin, an app connecting handymen with customers, ensuring a seamless user experience.
- Developed both the mobile app and dashboard for TetraOne, a real estate application, using React, Redux, and React Native.
- Contributed to the creation of VoixOut, a social media platform, by leading the front-end development and incorporating user-friendly features.
- Played a key role in the development of Odiopay, an e-commerce platform, by implementing robust front-end solutions and optimizing the user interface for a smooth shopping experience.
- Collaborated with cross-functional teams to ensure the integration of front-end components with back-end systems, enhancing overall system functionality.
- Proactively addressed and resolved issues related to user interface design and functionality, contributing to the overall success of the projects.

Front-end Developer

Startupagile   2022-2023

- Led the development of the user interface for Mamba Fantasy, a fantasy betting application, utilizing React Native and TypeScript to create a dynamic and responsive frontend.
- Collaborated closely with the development team to ensure seamless integration of the user interface with backend functionalities for Mamba Fantasy.
- Demonstrated proficiency in React Native and TypeScript to deliver a high-quality and engaging user experience in the frontend of the fantasy betting application.
- Successfully contributed to the overall architecture and design decisions for Mamba Fantasy, ensuring a user-friendly and visually appealing application.
- Spearheaded the design and implementation of user interfaces for various projects within StartupAgile, including the company's platform for founders to share knowledge.
- Took a hands-on approach to both frontend development and API integration for StartupAgile's internal projects, showcasing versatility in technical skills.

Full-stack Developer

Shebatime - E-commerce Platform for Cosmetics   2023 - 2024

- Spearheaded the end-to-end development of Shebatime, an innovative e-commerce platform specializing in cosmetics, covering both mobile applications and website.
- Single-handedly designed and implemented the frontend using React, Tailwind CSS, TypeScript, and React Native, ensuring a seamless and visually appealing user experience.
- Utilized React Native for cross-platform mobile application development, providing customers with a consistent and engaging interface on both iOS and Android devices.
- Implemented state management with Redux, enhancing data flow and ensuring a smooth interaction between components in both the mobile app and website.
- Developed a robust and scalable backend using Express.js and Node.js, leveraging MongoDB as the database to store and manage product information, user data, and transactions.
- Implemented responsive design principles to optimize the user experience across various devices, enhancing accessibility and usability.
- Established and maintained RESTful APIs for efficient communication between the frontend and backend components.
- Conducted thorough testing and debugging processes to identify and resolve issues, ensuring a reliable and high-performance e-commerce platform.
- Implemented features such as user authentication, product catalog management, order processing, and real-time inventory tracking.
- Stayed up-to-date with industry trends and emerging technologies to incorporate the latest advancements into Shebatime, ensuring a competitive and innovative edge in the cosmetics e-commerce market.
- Demonstrated strong problem-solving skills and attention to detail throughout the development lifecycle, from conceptualization to deployment.

Full-stack Developer

Bosscar - Car Selling Platform   2023 - 2024

- Orchestrated the full-stack development of Bosscar, a car selling platform, where users can seamlessly buy and sell cars.
- Took charge of both frontend and backend aspects, employing React and TypeScript for the frontend to create an intuitive user interface catering to both buyers and sellers.
- Implemented a seamless buying and selling experience on the platform, allowing users to list and purchase cars effortlessly.
- Ensured a uniform user experience across the mobile app and dashboard by developing with React Native for the app and React for the dashboard, utilizing Tailwind CSS, TypeScript, and Redux.
- Conducted thorough testing and debugging to ensure a polished and reliable platform that meets the needs of users involved in buying and selling cars.
